DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1 – 3, in Paper No. 7 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 - 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellis (GB 2,203,342 A).

As to claim 1, Ellis teaches a metallic material made of gold wire (page 3, paragraphs 2 and 3) known in the art to be a noble metal. The gold wire can be woven to create the metallic material (page 3, paragraph 3). Wires can be considered to be monofilaments because they consist of a single strand.

As to claim 3, Ellis teaches that the gold wire can be a gold alloy (page 3, paragraph 2).

As to claims 1 and 2, although Ellis does not explicitly teach that the claimed monofilament tensile strength is 0.12 to 6.5N as required by claim 1 and the monofilament elongation is 1.5% or more as required by claim 2, it is reasonable to presume that monofilament tensile strength is 0.12 to 6.5N as required by claim 1 and the monofilament elongation is 1.5% or more as required by claim 2 is inherent to Ellis. Support for said presumption is found in the

use of like materials (i.e. a gold alloy monofilament), which would result in the claimed property. The burden is upon the Applicant to prove otherwise. *In re Fitzgerald* 205 USPQ 594. In addition, the presently claimed property of would obviously have been present once the Ellis product is provided. Note *In re Best*, 195 USPQ at 433, footnote 4 (CCPA 1977).
